

kitett®

FISIO breast pump

with automatic and adjustable suction cycle

FISIO gives mother the natural feel of breastfeeding by faithfully and smoothly reproducing the action of a breastfeeding baby.

FISIO offers comfort and the opportunity to extend breastfeeding by combining simplicity of use and easy maintenance.

EASY TO USE

- A single adjustment control
- Adjustable suction cycle synchronized with suction strength
- Gentle stimulation and expression phases - according to the physiology of breastfeeding

EASY TO MAINTAIN

- Reliable
- Easy to assemble and clean

OPTIMUM COMFORT

- Customizing settings
- Used with the KOLOR® EXPRESSION KIT, single or dual pumping

DUAL PUMPING

- Time saving
- Increased levels of prolactin
- A significant increase in the prolactin rate: increased lactation

Extend breastfeeding with serenity

A single control for adjustment
